

Design Clinicals is certified by The Office of the National Coordinator (ONC)
for the following 2011 Meaningful Use Criteria

Met by Design Clinicals	General Criteria 170.302		
✓	170.302 (a) Implement drug–drug and drug–allergy interaction checks		
✓	170.302 (c) Maintain up-to-date problem list of current and active diagnoses		
✓	170.302 (d) Maintain active medication list		
✓	170.302 (e) Maintain active medication allergy list		
✓	170.302 (f) Record vital signs and chart changes (height, weight, blood pressure, body-mass index, growth charts for children)		
✓	170.302 (g) Record smoking status for patients 13 years of age or older		
✓	170.302 (o, p, q, r, s, t, u, v) Implement systems to protect privacy and security of patient data in the EHR		
Met by Design Clinicals	Inpatient Criteria 170.306		
✓	170.306 (a) Computer provider order entry (CPOE) for medication orders		
✓	170.306 (b) Record patient demographics (sex, race, ethnicity, date of birth, preferred language, date and preliminary cause of death in the event of mortality)		
✓	170.306 (c) Implement one clinical decision support rule and ability to track compliance with the rule		
	170.306 (d) On request, provide patients with an electronic copy of their health information (including diagnostic test results, problem list, medication lists, medication allergies, and for hospitals, discharge summary and procedures)		
✓	170.306 (e) Provide an electronic copy of hospital discharge instructions on request		
	170.306 (f) Implement capability to electronically exchange key clinical information among providers and patient-authorized entities		
	170.302 (n) and 170.306 (i) Report clinical quality measures to CMS or states		
Met by Design Clinicals	Menu Set (Select 5)	Met by Design Clinicals	Additional Menu Set choices for hospitals and critical access hospitals
✓	170.302 (b) Implement drug formulary checks		170.306 (g) Submission of electronic data on reportable laboratory results to public health agencies
✓	170.302 (h) Incorporate clinical laboratory test results into EHRs as structured data	✓	170.306 (h) Record advance directives for patients 65 years of age or older
✓	170.302 (i) Generate lists of patients by specific conditions to use for quality improvement, reduction of disparities, research, or outreach		
✓	170.302 (j) Perform medication reconciliation between care settings		
	170.302 (k) Submit electronic immunization data to immunization registries or immunization information systems		
	170.302 (l) Submit electronic syndromic surveillance data to public health agencies		
✓	170.302 (m) Use EHR technology to identify patient-specific education resources and provide those to the patient as appropriate		
	170.306 (f) Provide summary of care record for patients referred or transitioned to another provider or setting		
		In addition:	
		✓	170.304 (b) Generate and transmit permissible prescriptions electronically (does not apply to hospitals)
